

IBM Advanced Case Management Academy 2018

IBM and TechData are starting the ACM academy, to help our customers and business partners building the on the market needed skills.

For each role in this ACM profession there is a training track created for which the classroom training is scheduled in the January - May timeframe at Ternat (near Brussels).

Depending on your skills and availability, you can and need to subscribe for each session you want to attend from a track. In this document you find the schedules with link's to the subscription page from TechData and an estimate of the cost when attending the full track.

As an IBM business partner you may be eligible for reductions or you could benefit for some of the training from the 'You pass We pay' program, part of the optional 'IBM value package'. Make sure you request TechData information on potential reductions.

(https://www-356.ibm.com/partnerworld/wps/servlet/ContentHandler/pw_com_vpo_value_package)

All classroom trainings are also available in "Self Paced Virtual Training" format, which allow academy attenders to stay on track if a scheduled training can't be attended.

The first module will *start on Thursday January 25th in Brussels*. ACT now !

Feel free to contact Alain Verheyden (Alain_Verheyden@be.ibm.com) for more details, when you have questions on the ACM Academy.

Kind regards,

IBM ACM Academy Team.

The next pages contains information for the **4 developer tracks** :

- Report developers
- User interface and external information sources developers
- Custom component developers, and finally also
- Workflow authors.

The first 7 and last 4 modules of each developer track, are the same for all developers.
