

AWS training on the Job

Learn from our expert during your first guided AWS implementation

What does a Training on the Job Track look like?

- 

Step 1. As a technical professional who is new to Cloud Solutions:
You will start with a 1-day AWS Cloud Fundamentals Workshop. The price of this workshop is 595 euro per student per day.
- 

Step 2. As a technical professional who is familiar with Cloud Solutions but new to AWS advanced implementations:
You will join one of our 1-day customizable Workshops that are designed around the AWS Cloud Solutions. For instance on Security & Server, Databases, Storage, Migration, End user Computing and Applications. The price of this workshop is 595 euro per student per day.
- 

Step 3. Job preparation
To ensure that the project does not face any delay at implementation. The design and implementation strategy will be cleared out the student in an online meeting of half a day/3hrs. After this step the student is ready for Training on the Job.
- 

Step 4. Training on the Job
The student will be joining the live online implementation. The TD SYNnex COE-professional will communicate with the student about every step he is taking. This way the students learns how to implement an AWS Solution.
- 

Step 5. Evaluation
The Learning on the Job Track will be evaluated in a 1 hour online meeting. The COE-professional will provide recommendations concerning future projects and how to continue learning.

Cost
