WHY AWS TRAINING?

AWS Training and Certification empowers your team to build their competence, confidence and credibility to better support customers with essential knowledge of the AWS Cloud.

(* 451 Research, "Demystifying Cloud Transformation: Where Enterprises Should Start," September 2019)

Research shows that **90%** of IT decision-makers and hiring managers report cloud skills shortages*

Propel your organisation with cloud fluency

AWS Training and Certification helps build and validate the cloud skills that organisations need to transform their business and do more in the cloud. AWS partners who attended training or achieved AWS certification reported a variety of business benefits, including:

Improved quality of solutions and deliverables

Increased number of customers migrating to AWS solutions

Shortened implementation times

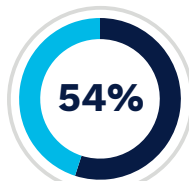

94% of AWS partners** who achieved AWS Certification reported at least one personal benefit, including:

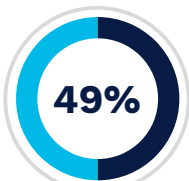

- Broadened skills
- Enhanced career opportunities
- Enablement to sell additional AWS services

(** Metrics That Matter, a subsidiary of Gartner, 2018).

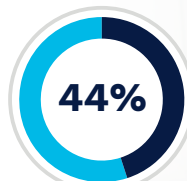

And IT decision-makers reported that AWS-certified professionals are:

Better at meeting client requirements
(54% agreed)

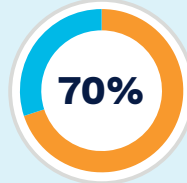

More productive
(49% agreed)

Faster trouble shooters
(44% agreed)

AFTER AWS TRAINING...

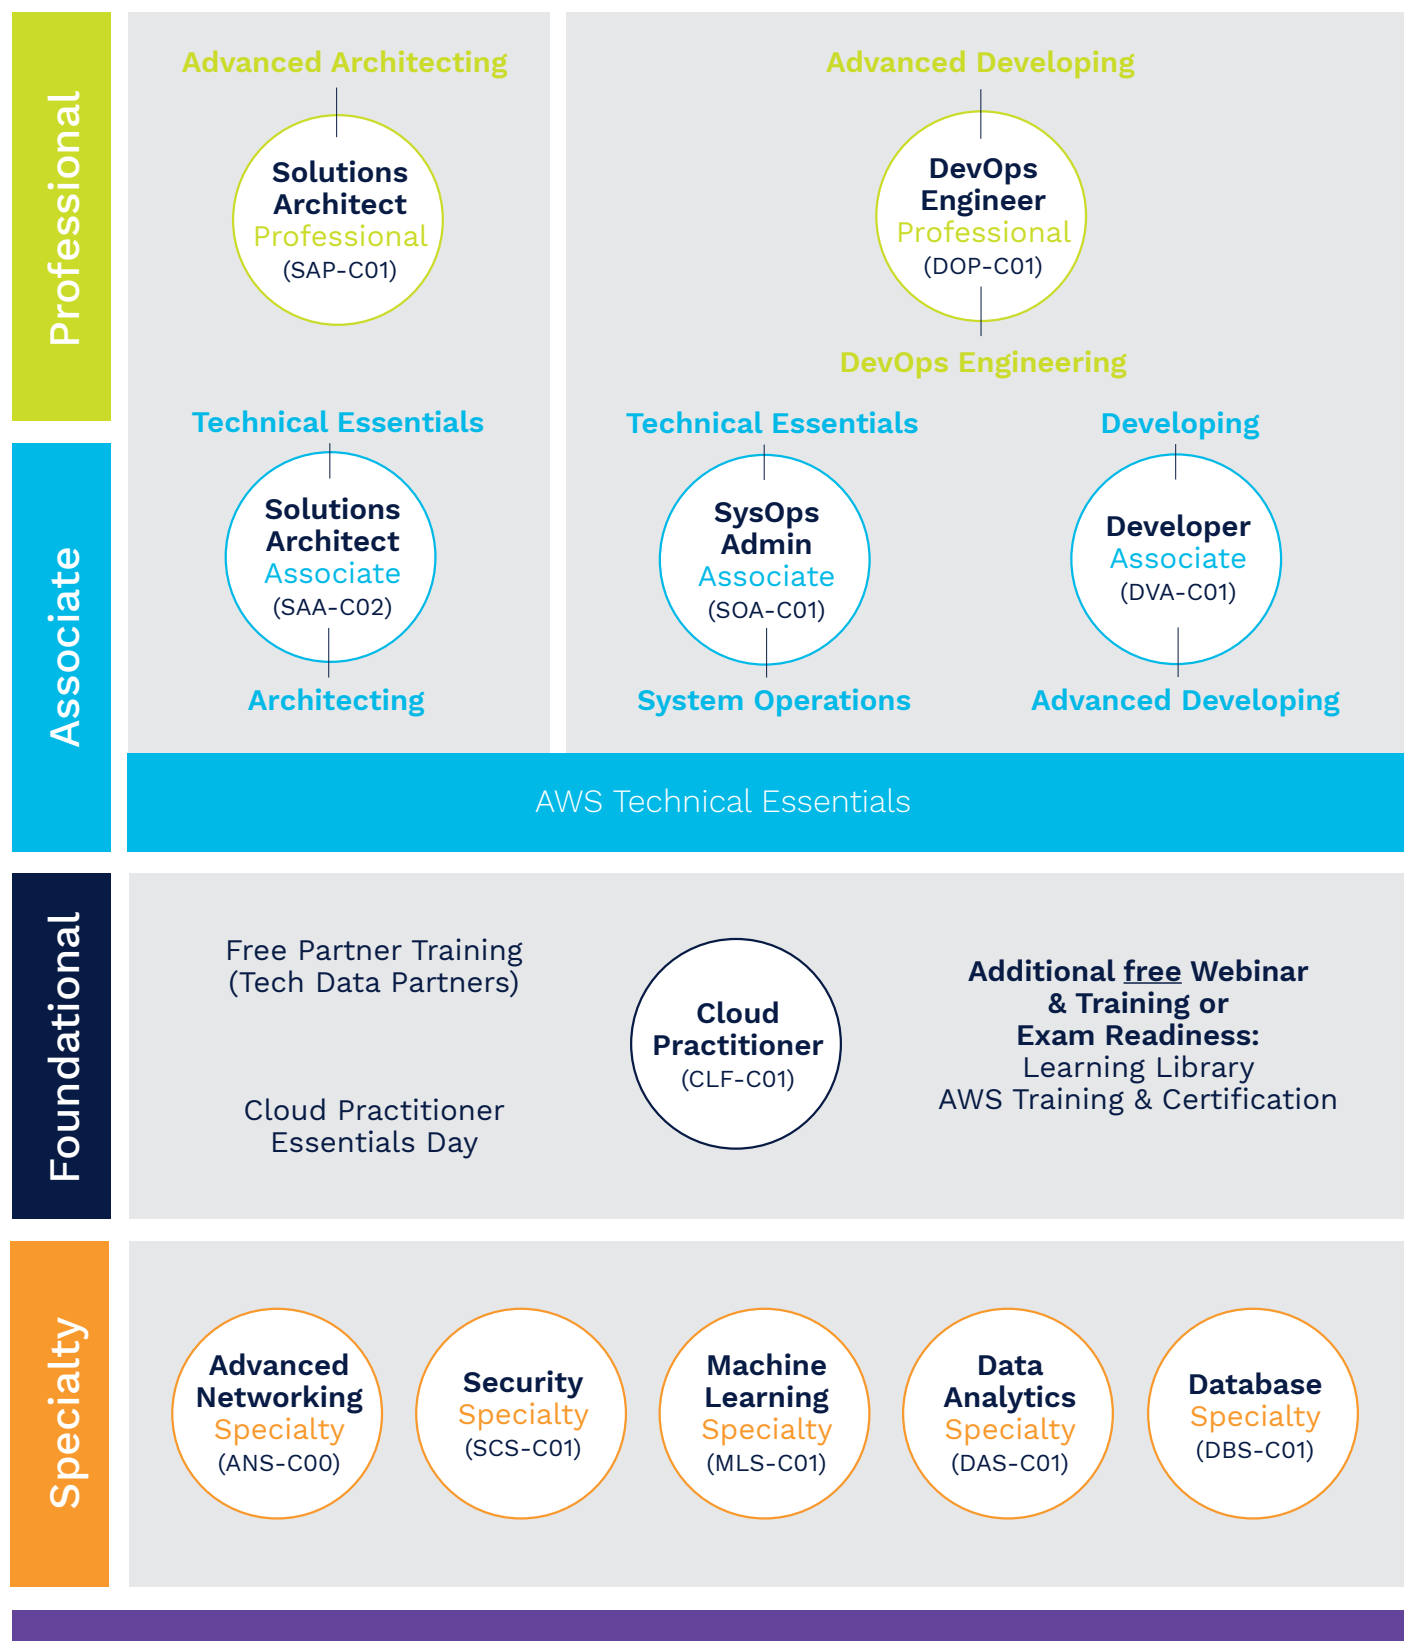

70% of IT professionals*** who took training to prepare for certifications said they were **more effective at work**

IT professionals who took training were **30% more satisfied** with their jobs than those without current training

(*** IT Skills and Salary report 2020)
