Are you interested in getting a Microsoft certification but struggling for missing 4/5 days of works in a row? We have an alternative training method which will suit your needs. With our Certification Fast Track Training, you can split your training into small sections.

Process of Certification Fast Track Training

Below are your 5 steps of your Certification Fast Track training:

1. **Self study:** You start with the part of theory and labs prior to the first day of training with our instructor. (max 18 hours, which can be spread out over several weeks)
2. **Instructor-Led Training:** The **2-day trainings** will provide hands on practice and theory
3. **Practice Test**: Continue to your study, lab practices and complete the provided Official Microsoft Practice Test. It shows you which topics need more attention.
4. **Instructor-Led Exam Preparation Training**: This **1-day** session will help you clear out any question that remains
5. **MCP exam voucher:** You book the official exam within 2 weeks after the Exam Prep Training.

The following Fast Tracks courses are currently available:

[Microsoft 365 Security Administration (MS-500T00-A-EP)](#)
The Microsoft 365 Mobility and Security course is designed for persons who are aspiring to the Microsoft 365 Enterprise Admin role. This course covers three central elements of Microsoft 365 enterprise administration – Microsoft 365 security management, Microsoft 365 compliance management, and Microsoft 365 device management.

[Microsoft 365 Mobility and Security (MS-101T00-A-EP)](#)
In this course you will learn how to secure user access to your organization's resources. The course covers user password protection, multi-factor authentication, how to enable Azure Identity Protection, how to setup and use Azure AD Connect, and introduces you to conditional access in Microsoft 365.

[Microsoft Azure Administrator (AZ-104T00-A-EP)](#)
This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.

Certification questions or can't find the course you want?
